

## CONDOMINIUM EXPENSES

### Understanding shared costs

Condominium homeowners are responsible not only for their personal utility costs—such as water, gas, and electricity—but also for shared condominium expenses. These shared costs include utilities for common areas, elevator maintenance (if applicable), and payments for cleaning or landscaping services. To fairly distribute these expenses, a system called the “thousandth” is used, which assigns a value to each unit based on its size or other factors, ensuring that costs are allocated proportionally among residents.

#### Overview “CONDOMINIUM EXPENSES”

**How are condominium expenses calculated?**

#### Context

Finances  
Citizenship  
Everyday life

**Cognitive processes**  
Managing situations  
Mathematising

#### Target group (incl. necessary prior skills and competences)

Adults and young adults who have basic knowledge of mathematics; curious about issues related to the management of expenditure.

**Dispositions**  
Flexibility

#### Content

Quantity and number  
Relationships  
Using a calculator

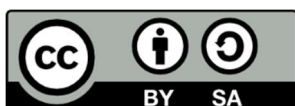

#### Outcomes and results

Learners will know the concept of thousandths and will be able to allocate expenses according to this criterion.

**Main information**

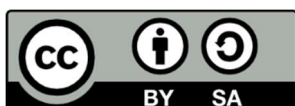

<b>Content</b>	Quantity and number; Direct proportionality; Using a calculator.
<b>Target group</b>	Adults and young adults who have basic knowledge of mathematics; they know how to do proportions and what is meant by “direct proportionality”. Learners are also curious about issues related to the management of expenditure.
<b>Learning intention</b>	Numeracy for personal and private purposes
<b>Duration</b>	Approx. 2 hours.
<b>Material and resources</b>	Slides examples of condominium expenses.
<b>Group size</b>	Range from 4 to 10 learners
<b>Problem statement</b>	The management of condominium expenses (i.e. utilities related to the common parts) takes place using the system of thousandths. In this way each condominium will pay its share in proportion to the property owned. Let’s find out together how this system works.
<b>Working questions</b>	<ul style="list-style-type: none"> <li>— What is meant by condominium expenses?</li> <li>— How are they divided?</li> <li>— How do you make the calculation?</li> <li>— Would you be able to check/check if the amount proposed by the administrator is correct?</li> </ul>
<b>Learning outcomes and results</b>	Learners will know the concept of thousandths and will be able to allocate expenses according to this criterion.

Working plan

Time (lessons)	Description of content/activities	Material	Methodical and didactic information <sup>1</sup>
30'+	<p><b>1. Discover</b></p> <p>At this stage the first questions are asked among the “<i>Working Questions</i>” in order to guide a lesson, which is as active as possible.</p> <p>The types of condominium expenses are treated, at the discretion of the teacher more or less in detail, but above all how the division of these expenses works (<i>thousandth</i>).</p>	Slides	Questioning Active learning [explicit teaching]
45'+	<p><b>2. Expense Calculation</b></p> <p>Once the concept of “thousandth” is addressed, learners, who should have a previous knowledge about the proportions, are asked how is the calculation to determine the expenditure of each condominium.</p> <p>Then exercises are assigned (see “<i>Appendix</i>”).</p> <p>This activity is carried out in pairs.</p> <p>This phase ends with the correction and revision of the exercises.</p>	Examples of condominium expenses	Hands on learning Collaborative learning
30'	<p><b>3. Discussion</b></p> <p>Learners share the main aspects learned during the activity.</p>		Feedback

<sup>1</sup> for description and explanation of kinds of tasks, HITs and other background information please consult the teacher’s/user’s guide
