

Guidelines to promote numeracy among adult education

Make NUMERACY visible

Create short images easily to disseminate (through social networks, for instance) making numeracy visible. Create popular sites including short news, themes, episodes, evidence of using numeracy in everyday life situations.

Provide access to resources

Facilitate the access to resources about adults learning mathematics. Create open access websites, repositories with open resources, etc.

Include adults' voices

Start from the adult learners' needs, connect with official numeracy frameworks, design your educational offer.

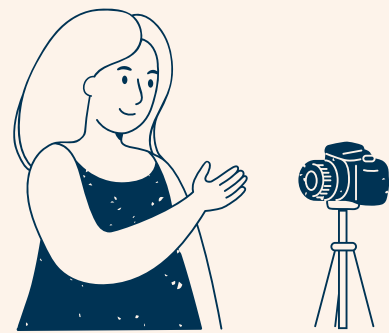

Find ways to reach the audience

Use dissemination channels that work in your community. Use social networks. Face-to-face. Other potential ways to disseminate, in popular meetings, events, etc.

Open the scope

Design and connect your offer with the opportunities in your context. Find grades, official certificates, exams... Disseminate your activities in the community.

Do networking

Talk with organisations in your community, find ways to collaborate with the main popular associations, libraries, also with local authorities (the municipality, cultural councils, etc.)
