

Research project name

Stakeholders - embedded
 Who are involved in the practice issue, and in what way do we want to collaborate with them in the research project?

Practice issue - relevant
 What is the undesirable situation? What opportunity is there to develop the practice?

Approach - appropriate

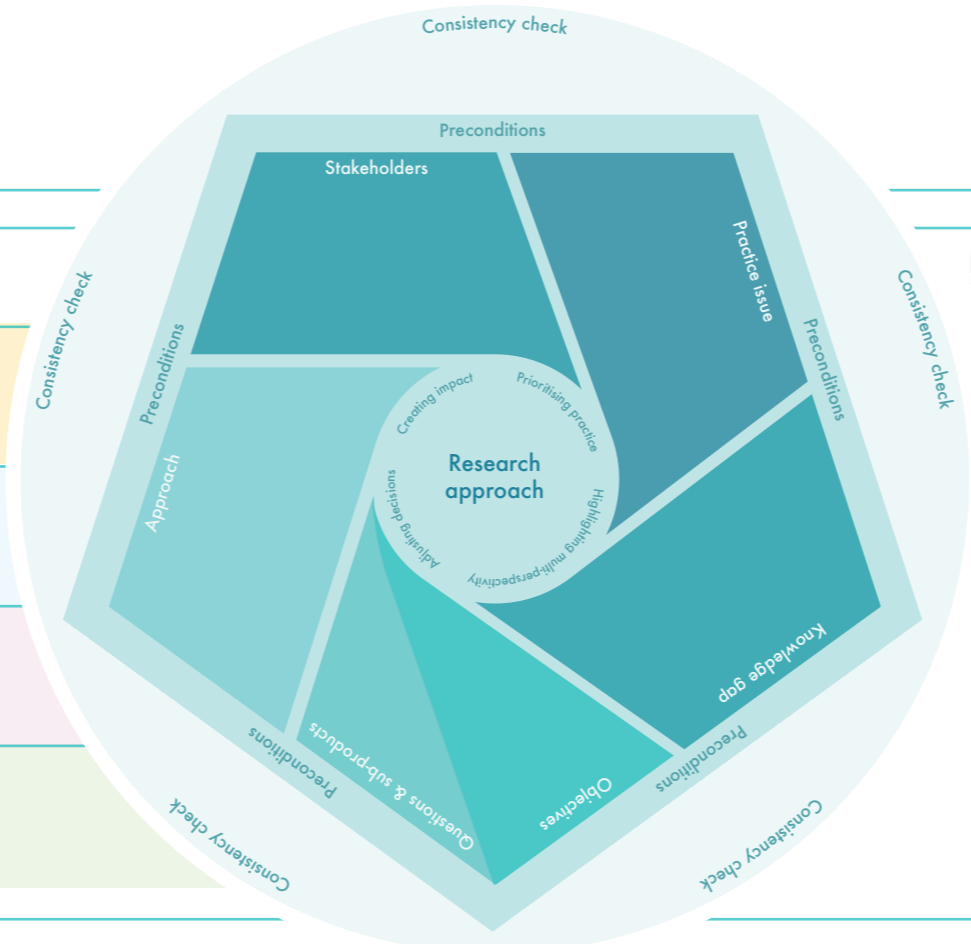

Knowledge objective
 How are we going to develop the knowledge?

Change objective
 How are we going to realise the change?

Design objective
 How are we going to design and test the artifacts?

Professionalisation objective
 How are we going to stimulate learning?

Knowledge gap - anchored
 What knowledge is available on the (approach to) the practice issue, and which is not yet?

Questions & products - functional, productive and logical

Questions belonging to the knowledge objective
 Which questions do we need to answer for the realisation of the change objective?
Products belonging to the knowledge objective
 Which interim results contribute to the realisation of the knowledge objective?

Questions belonging to the change objective
 Welke vragen moeten we beantwoorden voor het realiseren van het veranderdoel?
Products belonging to the change objective
 Which interim results contribute to the change objective?

Questions belonging to the design objective
 Which questions do we need to answer for the realisation of the design objective?
Products belonging to the design objective
 Which interim results contribute to the design objective?

Questions belonging to the professionalisation objective
 Which questions do we need to answer for the realisation of the professionalisation objective?
Products belonging to the professionalisation objective
 Which interim results contribute to the professionalisation objective?

Objectives - targeted

Knowledge objective
 What do we want to discover during the research project? Insight into...

Change objective
 What do we want to see improve or change in the organisations/culture/system?

Design objective
 What do we want to have produced at the end, concretely?

Professionalisation objective
 What should we and others have learned at the end of the research project?

Preconditions - feasible
 Subject to which preconditions does the research have to be conducted?

Consistency check
 - consistent
