INSTRUCTIONS

Scavenger hunt – Teacher instructions

Hello, welcome to the scavenger hunt. In this document you will find all the instructions you need before and during the scavenger hunt as a guide. This is how it works: the students start at the starting location and are given clues in the form of puzzles, riddles and assignments. Based on the answers and by completing the assignments, they receive the next location.

Course of the scavenger hunt

Note! Do not give out the information sheet about the new location and the corresponding task until you have arrived at the new location.

Preparations:

1. Choose a route

At the bottom of this page, you will find a link that allows you to view the route online. The start location is now Padualaan 101; change it to desired start location. Choose the route that best suits your institute. Please note that some routes are less suitable due to the overall walking distance. Put the location and assignment sheets for students in the correct order for the route.

2. Choose a café

On each route, you will pass a HU café. It is important that you go to the café that is of interest to your study (Het7de / Hideout / Het Proeflokaal).

3. With or without points?

The scavenger hunt can be done with points. If you choose to do so, it is a matter of keeping track of them. The points you can give will be described at the top of the route page.

4. With or without consequences?

You can choose that if students do not pass assignments on time or if they need a tip, there will be a consequence attached. These are not mandatory of course, but might be fun for the group dynamic. At the bottom of the assignment an example of a possible consequence is given. You can adjust these yourself to consequences as big or small as you like.

5. Library assignment

On each route, you will visit the HU library to find out where to get your books and where to sit if you want to study quietly. At this location, the students will complete an assignment where it is nice if something is prepared.

Assignment: It's time to work together. Your teacher has prepared a course that you have to complete with a stack of books on your head. If two people successfully complete the course, you will get a letter from the hidden abbreviation. Good luck!

For the teacher: In advance of this assignment, you have to think about the course. You can ask the students to make their own using bags and other objects. It is also possible that you prepare something yourself. You can think of a hoop they have to pass through, books they have to hold on their heads, items they have to pass without using their hands or have them turn around before starting the course.

6. Pen and paper

It is useful to have students bring pen and paper as only one person is allowed to use a phone.

7. Guidance

To make the scavenger hunt run smoothly, it is helpful if students are in contact with a facilitator to check assignments and get hints for subsequent assignments. Two examples for how this can be done is by having a supervisor walk with them, or by creating an app group for each group.
