

HANDLEIDING MANUAL

ECOSIA ALS STANDAARD ZOEKMACHINE IN MICROSOFT EDGE

Hoe stel je Ecosia in als standaard zoekmachine op je HU laptop

How to choose Ecosia as standard searchengine on your HU laptop

GREEN OFFICE HU

WAAROM ECOSIA?

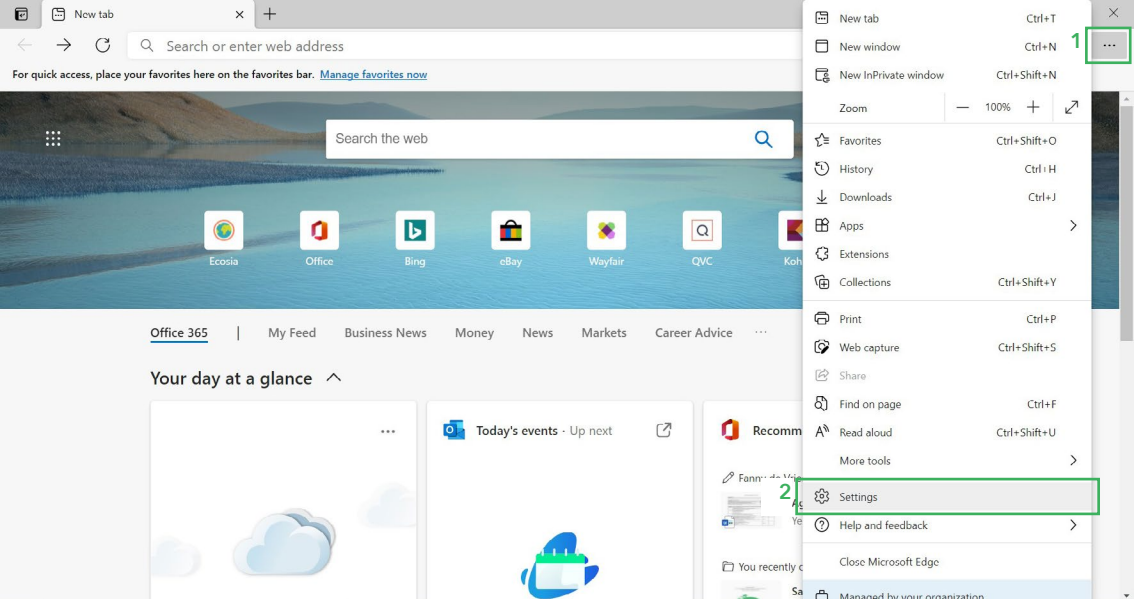

Ecosia is een zoekmachine die bomen plant met de zoekopdrachten die jij uitvoert.

De bomen die Ecosia plant komen van nature voor in het lokale ecosysteem en Ecosia traint en betaalt de lokale bevolking om zorg te dragen voor de bomen.

Verder verkoopt Ecosia jouw gegevens niet door aan adverteerders en kun je alle tracking uitschakelen.

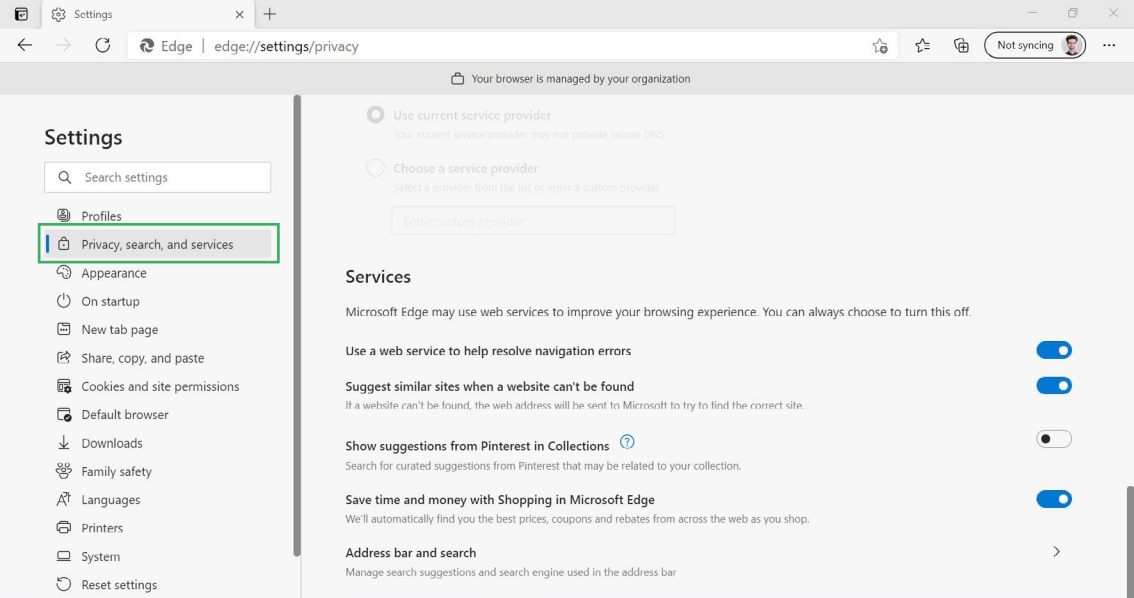

In deze handleiding laten we je zien hoe je Ecosia instelt als standaard zoekmachine in de Microsoft Edge browser op jouw HU-laptop.

Het zijn even een paar stappen, maar moeilijk is het niet. En hierna verwijder je met elke zoekopdracht 1kg CO!

Open Microsoft Edge, open het menu door te klikken op ¹de drie bolletjes in de rechterbovenhoek en klik op ²«Settings».

Open Microsoft Edge, open the menu by clicking the ¹three dots in the upper right corner and click ²«Settings».

In de instellingen klik je op
«Privacy, search and services».

*In settings, click
«Privacy, search and services».*

The image shows the Microsoft Edge settings page. The left sidebar contains a search bar and a list of settings categories: Profiles, Privacy, search, and services (highlighted), Appearance, On startup, New tab page, Share, copy, and paste, Cookies and site permissions, Default browser, Downloads, Family safety, Languages, Printers, System, and Reset settings. The main content area is titled 'Services' and includes options for using current or choosing a service provider, using a web service to help resolve navigation errors, suggesting similar sites, showing suggestions from Pinterest, and saving time and money with shopping. At the bottom, the 'Address bar and search' option is highlighted with a green box, with a right-pointing arrow next to it.

Use current service provider
Your current service provider may not provide secure DNS.

Choose a service provider
Select a provider from the list or enter a custom provider.

Enter custom provider

Services

Microsoft Edge may use web services to improve your browsing experience. You can always choose to turn this off.

Use a web service to help resolve navigation errors

Suggest similar sites when a website can't be found
If a website can't be found, the web address will be sent to Microsoft to try to find the correct site.

Show suggestions from Pinterest in Collections ?
Search for curated suggestions from Pinterest that may be related to your collection.

Save time and money with Shopping in Microsoft Edge
We'll automatically find you the best prices, coupons and rebates from across the web as you shop.

Address bar and search
Manage search suggestions and search engine used in the address bar

Scroll helemaal naar beneden en ga naar «Address bar and search».

Scroll all the way down and go to «Address bar and search».

The image shows the Microsoft Edge browser settings page. The address bar at the top displays 'edge://settings/search'. The left sidebar contains a list of settings categories: Settings, Profiles, Privacy, search, and services (highlighted), Appearance, On startup, New tab page, Share, copy, and paste, Cookies and site permissions, Default browser, Downloads, Family safety, Languages, Printers, System, and Reset settings. The main content area is titled 'Privacy, search, and services / Address bar and search'. It features two toggle switches: 'Show me search and site suggestions using my typed characters' and 'Show me suggestions from history, favorites and other data on this device using my typed characters', both of which are turned on. Below these is a section for search engines, starting with a link to 'Benefits, available only with Bing Search from Microsoft'. Two options are listed: 'InPrivate search' and 'Enterprise search'. At the bottom of this section, there is a dropdown menu for 'Search engine used in the address bar' set to 'Bing (Recommended, default)'. A green rectangular box highlights the 'Manage search engines' button, which has a right-pointing arrow.

Klik op «Manage search engines».

Click «Manage search engines».
