THE EVENT

Due to the succes of previous editions, the Avicenna: Health Hack board and MIT Hacking Medicine have joined forces again to ensure you of a first-class event! During the online hackathon, participants from different areas of expertise will design and create innovative solutions for healthcare-related challenges. By combining the expertise of students, patients, healthcare professionals and IT-professionals, this hackathon will be a stepping stone for innovation in healthcare.

This year's theme is *Hybrid Healthcare:* a very relevant topic, now more than ever! During this event, participants will have to find an adequate balance between offline and online healthcare, while working on innovations for real-life healthcare cases.
